Due to the long shipping time and the fact that a number of horses ship into Iroquois early, consideration has been given to providing the necessary care for the horse. The following points are clarified:

1. Electrolyte fluids may be given by a licensed veterinarian up until the race day period- 24 hours before the first post. Attending veterinarians have been informed.
2. As many horses receive ulcer medication- Gastrogard, a 24 hour withdrawal is recommended and this will be given on the grounds on Friday morning by the attending veterinarians. Horsemen should not self administer and the veterinarians will properly dispose of all applicators.
3. For those shipping in 48 hours prior to post and administering non steroidal anti-inflammatories at the 48 hr. time period, please be sure that all syringes and needles are disposed of off the grounds and not placed in a van. All horse transport and vehicles on the grounds are subject to search during the race period.
4. All devices that might be used to administer nebulization or salt therapy prior to the race period must be removed from the grounds before the race period begins- 24 hrs prior to the first post.
