NYSGC Equine Medical Director Advisory: Guidance to Protect Horses Racing in Hot Weather On December 20, 2022, the US Food and Drug Administration (FDA) approved Zycosan (pentosan polysulfate sodium injection) for control of clinical signs associated with osteoarthritis in horses.

https://www.fda.gov/animal-veterinary/cvmupdates/fdaapproves-first-injecta2 is the first injectable form of Pentosan to be approved for use in the horse by the FDA.

ZYCOSAN ADVISORY

Zycosan is being marketed for intra-muscular use in horses with Zycosan is being marketed for intra-muscular use in horses with osteoarthritis. Appropriate treatment of osteoarthritis should include both disease-modifying and symptom-modifying medication. Zycosan is a symptom-modifying medication. It will do nothing to modify the disease process of osteoarthritis, but will help to control the clinical signs (e.g.: lameness) associated with it. The Zycosan recommended treatment regimen is 1 intra-muscular injection of Zycosan (3mg/kg) once every 7 days for a series of 4 treatments. Individuals contemplating the use of Zycosan in horses training and racing at New York racetracks should be aware of the following: Given that Zycosan is not currently listed in the Rules and Regulations Chapter I

Chapter I

(Division of Horse Racing and Pari-Mutuel Wagering) Subchapter A (Thoroughbred Racing) 9 NYCRR 4043.2, paragraph (h) and Subchapter È

(Harness Racing) 9 NYCRR 4120.2, paragraph (n) apply: No other drugs or medications (including procaine) may be administered by any means within one week of the scheduled post time of the race in

which the horse is to compete. By rule, intra-muscular administration of Zycosan is not permitted within 7 days of the scheduled post time of the race in which the horse is to compete.

Additionally, medications administered by an intra-muscular route may have variable absorption and elimination times. Repeated administrations of any medication can lead to accumulation of the drug in the system of the horse. For these reasons and until such time as administration studies can be performed to determine the elimination times for cumulative administration of Zycosan, the use of Zycosan in horses that are racing at New York racetracks is discouraged to prevent an adverse medication finding finding.

SAME TRAINER ENTRY RULE CHANGE Effective at the start of the Belmont at The Big A meet (September 15th), the rule disallowing a trainer to have multiple entries of different owners in a race to the exclusion of another trainer's single entry is rescinded. Condition eligibility, then date preference, then same owner entries will determine which horses are drawn into a race.

ATTENTION TRAINERS AND VETS Recently, there have been some questions posed regarding the Commission's rules pertaining to the use or possession of growth hormone or growth factors by trainers or veterinarians at New York racetracks and while training horses to race in New York. This memorandum is intended to provide clear notice of the Commission's Thoroughbred regulations pertaining to possession or use of growth hormone or growth factors.
