Foal papers are not required to be on file with the Horse Identifier at the races providing the horse can be properly identified; and tattoos or microchips are required for all horses, with a one-time exception providing the horse can be identified by his/her markings. All scratches must be made no later than one hour prior to post time for the first race.

Turf height is 5-7 inches and will be cut again to maintain the desired 6 inch height. The turf is green and lush. The racing surfaces are smooth. The course has been areated several times this summer and fall.

Irrigation has been constant over the last 3.5 weeks applying 1.25 inches a week to the entire course.

Compaction was measured with both the Longchamp penetrometer and the older Lange penetrometer. it should be noted that the Longchamp is the standard for racing surfaces worldwide and the Racing Surfaces testing Lab at the University of Kentucky has recommended that NSA use this instrument to measure our courses going forward. The LC will be used this fall when available and likely mandated next spring. Moisture measurements are to be done with the TDR or Pogo moisture meters as recommended by UKy and Mid Atlantic turf consultants.

At Foxfield the Longchamp penetrometer averaged good to firm on the hurdle course with average reading of 1.58 inches. The older Lange measured 86. Moisture was 34% - good. The flat coursewas firm, good in places with 34% moisture. We will update the course report after the rainfall.
